

Idea Market

From Ideas To Reality

Post. Validate. Connect. Build.

Idea / Project Title

Idea Market

Problem Statement

Ideas stall before they become projects

Theme

Open Innovation

Team Name

Idea Market

Team Members

P. Harish Sarathy, RM Harihara
Manickam

Institution

JAIGOPAL GARODIA HINDU VIDYALAYA
MATRIC HR SEC SCHOOL WEST
MAMBALAM CHENNAI TAMIL NADU

Great Ideas Get Stuck

01

Funding & Resources

No seed money, tools or infrastructure to build even a first prototype.

02

Skilled Teammates

Solo innovators cannot find the developers and designers an idea needs.

03

Mentorship & Guidance

No experienced voice to challenge assumptions or point to the next step.

04

Validation & Visibility

No way to test whether an idea is worth building, and no audience once it is.

Idea Market

A platform that connects ideas with people, knowledge and resources.

POST → ANALYZE → VALIDATE → CONNECT → SUPPORT → BUILD → SHOWCASE

We don't just help people share ideas. We help ideas move forward.

How Idea Market Works

From a raw concept to a working project, in one continuous flow.

AI + Idea Intelligence

WHAT THE AI ANALYSES

Problem and target users
Innovation indicators
Technical feasibility
Potential challenges

SIMILARITY DETECTION

Semantic search across ideas
Finds related concepts
Highlights areas of overlap
Surfaces existing projects

HUMAN JUDGEMENT FIRST

AI suggests, people decide
Sharpens the creator's thinking
Flags gaps, not verdicts
Never replaces human judgement

ANALYSIS PIPELINE

The Idea Ecosystem

One idea can bring together an entire team.

Trust and Delivery

01

Idea Documentation

Version history, timestamped updates, private and public controls, and collaboration permissions. Documentation supports traceability; it is not a substitute for legal IP protection.

02

Project Workspace

Tasks, files, milestones, progress tracking and team collaboration, all in one workspace.

03

Verification & Trust

User and project verification, structured feedback, reporting, and a visible contribution history.

A Real World Example

How one student idea becomes a tested, showcased prototype.

THE SPARK

A student's neighbourhood floods every monsoon with no early warning. Instead of leaving the idea in a notebook, they post a flood-detection concept on Idea Market.

THE JOURNEY

- 01 Posts the idea — AI analyses feasibility and risks
- 02 Discovers related flood-sensing work already out there
- 03 Connects with an IoT developer and a domain mentor
- 04 Finds a sponsor willing to fund sensors and hosting
- 05 Builds, tests and showcases a working prototype

Why Idea Market?

TODAY: SCATTERED

Ideas sit in notebooks
Talent is on other platforms
Mentors are hard to reach
Funding is a separate world

IDEA MARKET: TOGETHER

One place to post and test
Teammates matched to the idea
Mentors inside the workflow
Sponsors see real progress

WHAT CHANGES

Feedback in days, not months
Teams form around concepts
Progress is visible and verifiable
More ideas reach a prototype

THE IDEA MARKET PATH

Idea Market

Where Ideas Find Their Next Step.

No idea should remain only an idea because of a lack of opportunity.
